Vocabulary of Modern English translated into Italian .	i—cxxxv

INTRODUCTORY REMARKS

1. THE design of this book is to meet the requirements of an English student of Italian rather than those of an Italian student of English. The English-Italian vocabulary is merely for the practical convenience of English-speaking people who may have occasion to speak or write in Italian. Obsolete words have therefore been excluded from this part of the book.

2. Geographical names which differ in the two languages have been entered in alphabetical order among the ordinary words.

3. The sources drawn upon have been as follows. For marine and engineering matters the authorities utilised are the marine and technical dictionaries of Dabovich, Guglielmotti and Paasch, the last named of which is distinguished by a beautiful series of plates. The names of land animals otherwise unknown to me have been ascertained by taking the scientific names given by Bulle and Rigutini and looking these out in Baird's *Cyclopaedia of Natural Science*, those of birds in a similar way by comparing the scientific names in the list of birds in the *Manuale del Cacciatore*, one of the series published by Hoepli, with those in Morris's *British Birds*, those of fishes directly from Dabovich, and those of plants from the *Catalogo poliglotto delle piante* by the Contessa di San Giorgio. The bulk, however, of the volume is of course occupied with general literature, and has been compiled from Petrocchi (*Dizionario universale della lingua italiana*), Tommaseo and Bellini (*Dizionario italiano*, in eight quarto volumes), Bulle and Rigutini (*Italienisches-Deutsches Wörterbuch*), and Rigutini and Fanfani (*Lingua italiana parlata*). From one or another of these all the idioms and illustrative phrases are taken, most of them being from Petrocchi. Occasional use has also been made of most of the dictionaries enumerated in the list below.

4. Illustrations of the meaning of obsolete words are given, generally speaking, without specifying their sources, but on account of the position held by Dante in Italian literature quotations from the *Divina Commedia* are followed by reference to canto and verse. References are also supplied in a few other cases when the interest or peculiarity of the word seemed to make this desirable, as in the instance of the word Capere.

5. It may be convenient to set out here the method pursued in arranging the information presented. The head word, together with any variants in its spelling and with any obsolete variants in a parenthesis, is followed by *m.* or *f.* to mark its gender, when a substantive, and by a statement of its etymology in another parenthesis when this can be given with suitable brevity, as mentioned below. This is followed by an exposition of the meaning or meanings and of the principal idiomatic phrases in which the word occurs.

6. Obsolete and local words are distinguished by an asterisk and dagger respectively, and the obsolete or local meanings of words which in some senses are still in general use, as well as the corresponding idioms and phrases, are similarly distinguished and in addition are numbered in Roman numerals i, ii, iii..., the current phraseology being separated into sections with Arabic numerals 1, 2, 3.... This numbering is purely for convenience of reference, and is not intended

to imply that the word in question has so many different senses. Where a word represents one or more words really different in origin the article upon it is divided into separate parts distinguished by Roman capitals A, B, C.... This separation, however, is not carried into the account of the obsolete uses of a word; for instance, Granata.

7. It will be noticed that apart from the distinctive characters of the head words in their alphabetical order, there are two sizes of print throughout the dictionary. The larger of these has been used for those words which will be most looked for, and the smaller type for the rest. In the latter category are included all obsolete and local expressions and technical terms, words which are immediate derivatives of other words, such as substantives in -amento, -atura, and so on, known as verbal substantives, as well as adjectival substantives and verbs and adjectives formed from substantives, and also words which are practically identical in Italian and English. The local terms are marked with a dagger, as stated above; they are for the most part Tuscan, and Petrocchi's collection of them seems to be a fairly full one. They are distinguished by him according to the districts where they are in use, but it did not appear necessary from the point of view of the present book to state these localities.

An intermediate size of type has been employed for the Anglo-Italian vocabulary.

8. The derivatives above referred to, together with their sub-derivatives and all the diminutives, augmentatives, "peggiorativi" and so on, which are so abundant in Italian, when the alphabetical order makes them follow their primary, are marked with the abbreviation *Aff.* (affiliated), and as a rule it is left to the common sense of the student to see their meaning; there is really no more reason for giving a separate translation of a word like Borbottamento, a verbal substantive of Borbottare, to stammer, than of, say, Borbottano, the third person plural of its present tense. Such groups of words might perhaps have been labelled Derivatives, but sometimes, as for instance under the word Platino, they include compounds partly formed from other words—left untranslated because the second element is practically identical with a corresponding English word—and sometimes they are sub-derivatives; thus both Causare and Causazione are in this book affiliated to Causa. Sometimes, again, an affiliated word is from a Latin original; thus Flatulento is from the Latin *flatulentus*, not from Flato, the word to which it is affiliated. The abbreviation *Aff.* is therefore to be taken to indicate that the words against which it stands are for the most part left untranslated, and that their meaning is then to be ascertained by reference to the preceding head word. A slight departure from alphabetical order has sometimes been made with words of this class; for instance, a verbal substantive in -amento affiliated to the corresponding verb in -are follows instead of preceding it.

9. The same principle of leaving out unnecessary translations has been followed with the head words where the Italian and English are sufficiently similar; no one would look out such a word, for instance, as Educare, since it obviously means Educate. The abbreviation "as E." has been employed in these cases, and may be regarded as indicating that the word is employed in the same way as the corresponding word in English. Words of this character might really be omitted altogether; it is, however, just possible that a dictionary might be consulted by a person wishing to know if there was such a word in Italian as Educare. For this reason no uncompounded word has been intentionally excluded from the book which could possibly be met with in an ordinary newspaper as Italian, with the exception of purely technical terms of science which have been included only where the meaning of the Italian expression might not be self-evident to an English master of the science concerned, or where there is some feature of special interest in the word or its derivation, *e.g.* Lucilia. No English doctor or chemist could possibly fail to see the meaning of such terms as Pericardite, Trimetilamina, or wish to see them translated into their English dresses as Pericarditis, Trimethylamine.

10. Where an Italian word and its English equivalent have the same variations of meaning no notice of such variations is taken, however widely the several meanings may differ from each other. Thus Caso, like the English Case, means grammatical case, legal case, chance, circumstance; Piede, like Foot, is used for a foot of a verse. The context would make it clear what sense was intended, whilst, if in some peculiar instance it was not clear, the setting out of the various possible significations in a dictionary would make the matter no clearer.

11. In some instances of obsolete words the explanation is given in Italian, and in all such cases is transcribed from Petrocchi. The reason of this is that it is not always possible to tell without the context what is intended, but anyone using the dictionary to find the meaning of a word will have a context before him, which will probably make the matter plain. Examples will be found under Cofoggiata, Cofollo, Daghesciare.

12. All changes of spelling are not given; many words are spelt variously with double or single consonants such as Commento or Comento, seam in the deck of a ship, and with or without a final e, like Agon or Agone, the gar-fish, but it is hoped that all variations are entered which are necessary to enable any word to be found.

Accentuation.

13. A tonic accent is supplied to the head word in all cases where it seemed desirable to indicate the pronunciation, that is, to the majority of words other than verbs in -are or -ire, of more than one syllable. The hard and soft s and z are distinguished by having a dot over them when they are soft; thus ṡ has the sound of an English z, and ż of dz, the undotted z being pronounced ts and the undotted s hard as in 'this.' These dots are only given to the head words, not where the s or z occurs in any of the illustrative phrases, and the same rule has been followed as regards the tonic accent. The "open" and "close" pronunciation of the vowels E and O is indicated in the head words by a grave and acute accent respectively. No marks of accentuation, except on a final vowel, have been supplied to the obsolete words.

Diminutives and other accessory forms.

14. There is a great variety of these in Italian, indicated in the text by abbreviations corresponding to the meanings. Of these abbreviations *dim.* for diminutive and *augm.* for augmentative speak for themselves, but *pegg.*, *scherz.*, *spreg.* and *vezz.*, which stand for Italian words with no simple English equivalent, may need a little explanation. A *peggiorativo*, that is a word with a suffix of this, so to say, pejorative character, in Italian usually *-accio*, denotes a bad quality of the primary, as Ragazzo, boy, Ragazzaccio, horrid boy; *scherz.*, for Ital. *scherzando*, means that the term is used jestingly; *spreg.*, for Ital. *spregiante*, indicates contempt or disparagement; and *vezz.*, for Ital. *vezzeggiativo*, denotes endearment or some kind of prettiness.

It may be remarked here, *à propos* of diminutives, that when a word has two diminutives, *viz.* in -ina and -ino, the termination -ino indicates the smaller of the two, and both of them are in many cases not only of a diminutive character but also are "vezzeggiativi." Thus Ragazzino is marked in the dictionary *dim. vezz.*, *i.e.* dear little boy. All these suffixes can be freely piled upon one another, as Abatucciaccio, marked *dim. spreg. pegg.*, meaning something like "horrid dirty little abbot," Fratacchione, marked *augm. pegg. scherz.*, meaning that it is a term employed jestingly for "great lout of a monk," or something of that sort. Almost the entire set of such formations will be found under the word Donna.

Etymology.

15. Every principal word, the source of which has been traced by philologists, has its derivation stated shortly in a parenthesis preceding its explanation, unless the interest of the word or of its connections is such as to justify a longer account. Where this is the case such an account has been appended in small type. The most complete account of Italian etymology is that by Prof. Pianigiani, whose book on the subject is accordingly the one chiefly followed here, but extensive use has also been made of Körting's *Lateinisch-Romanisches Wörterbuch*, Walde's *Lateinisches etymologisches Wörterbuch*, Prellwitz's *Etymologisches Wörterbuch der Griechischen Sprache* and Skeat's *Etymological English Dictionary*, whilst the other etymological books mentioned below have occasionally been consulted.

16. Where there is an English word, or words, akin to the word under discussion the immediate parentage and connections of the Italian word are briefly given, coupled with a reference to Skeat for readers desirous of more information. Such references may be taken as being made either to Prof. Skeat's *Concise Etymological Dictionary*, Oxford 1901, or to the 1910 edition of his larger etymological dictionary, except where specific reference is made to the latter.

17. All Italian words in ordinary use are discussed by Pianigiani, but there are a considerable number of obsolete or technical terms, especially seafaring terms, which are not touched upon by any writer and to which there seems to be no cognate form in any other of the Romance languages. In such cases nothing can be said about the derivation, and the observation which occurs here and there in the present book that an etymology is doubtful or unknown is to be taken as shewing that though the word is discussed by the authorities no definite history is obtainable, the etymology given being only guess-work, not indeed the wild guessing of former days, but still guessing.

The derivation of words of learned formation from Greek has been given only in a few exceptional cases where it could not readily be traced by anyone with a smattering of Greek by reference to a Greek lexicon.

18. A word marked thus (*L.*) is to be taken as derived from an almost exactly similar word in Latin, with the implication that little or nothing is known of its remoter origin. Thus Sanie is from the Latin *saniem*, accusative of *sanies*, but nothing is known of the origin of this.

19. An asterisk is commonly used by etymologists to mark a word, the former existence of which can be inferred from known forms, though it may not be found in any author whose writings have come down to us. In the Romance languages many words occur which point clearly to a Latin original of this kind. Such hypothetical forms are marked in the present book with a double asterisk, a single asterisk having been appropriated as above stated to words occurring in old Italian authors but now obsolete.

20. The algebraical signs >, <, are employed to signify "source of" and "derived from" respectively, after the example of Prof. Skeat. I cannot pass on without expressing the great obligation I was under to Prof. Skeat personally for the unfailing kindness with which he replied to numerous questions on knotty points and saved me from many mistakes.

21. In referring words to a Latin original, the nominative case has been generally used, though the actual source of Romance words is not the nominative but the accusative. It seemed more convenient to give the reference in this way to a word which would be found in a Latin dictionary by its nominative, and could not mislead, since no one would suppose that such a word as Vindice would be from Vindex rather than Vindicem.

Conclusion.

22. No pains have been spared to make the book as accurate as possible, but mistakes must inevitably have crept in, the correction of any of which will be gratefully received. The work was begun in the autumn of 1906, and the first draft completed in the spring of 1911; its aim throughout is the practical one of explaining only what needed explanation for an English student, not that of presenting a thesaurus of the Italian language. The book is not written for children; a competent knowledge of English in the reader is assumed; but it is framed to cover the requirements of a beginner, and anyone should be able to make out the meaning of ordinary Italian books by its aid, as soon as he has obtained some rudimentary knowledge from a grammar. Lastly, I wish to express my best thanks to Signorina Bianca Castelli, who has acted as my referee on all points where it seemed desirable to have the assistance of a native of Italy.

NOTES UPON THE ITALIAN LANGUAGE

Origin.

Italian, like the other Romance languages, French, Provençal, Spanish, Portuguese, Roumanian and sundry dialects less widely spoken, is a modified form of ancient spoken Latin, but has embodied in itself considerable accretions from Germanic and other sources, introduced by invaders from the north and off the sea. It is, in fact, the nearest of these languages to old popular Latin, or Folk-Latin, as it has been called, which is what one would expect from the fact that Italy was the home of Latin. In tracing the etymology of a word, it is often the case that we can take it back to a Latin or Old High German original, but no further; these languages form a wall behind which it is frequently impossible to go so as to reach the primitive root. The loose way in which Italian was developed out of popular ungrammatical Latin is well illustrated by the numerous feminine substantives formed in the singular number from an original neuter plural, *e.g.* Battaglia from *Battualia*.

Punctuation.

Italians make use of stops in a way which sometimes is quite different from the way in which they are used in English, and it is desirable for an English reader to be on his guard upon this point. An illustration is given under the word Punteggiare.

Pronunciation.

All words are pronounced as they are spelt. As regards the accentuation this is indicated in the book as stated in the Introductory remarks, § 13, but there are one or two general rules which a student may find it convenient to bear in mind. The termination -ano in the third person plural of the present and imperfect tenses of a verb has the a short, -ăno, the stress falling upon the antepenultimate, as Érano, they were, Mandávano, they were sending. But -ano as the termination of a substantive generally has the a long, -āno, as Miláno, the city of Milan, Pastráno, cloak. It will be found also that derivative words ending in -olo, or with the Florentine pronunciation -uolo, which express implements, occupations, or trades, have the accent on the penultimate, and the o "open," as Fumaiòlo, smoke-stack, whilst words in -olo of other descriptions are accented on the antepenultimate, as Bòssolo, box.

Gender.

To the rules in the grammars may be added that scientific terms in -íte are feminine.

First person plural of verbs.

There is a usage, which to an English person seems curious, of substituting the indefinite third singular for the first person plural, as Noi si dice, for Noi diciamo, we say.

Sequence of tenses in a conditional sentence.

When the verb of the protasis is in the perfect tense, the past conditional must be used in the apodosis even though it refers to future time, as, If he went to France he would get what he wants, Se fosse andato in Francia avrebbe trovato ciò che vuole. To make the simple conditional admissible the protasis must be taken out of the perfect tense, as Se andasse in Francia troverebbe ciò che vuole. When the protasis is in the perfect the exact meaning of the Italian phrase might be ambiguous in the absence of a context, *viz.* either If he went to France he would get what he wants, or If he had gone to France he would have got what he wants.

Etymology of the open and close E and O.

It will be found that an open E in Italian corresponds to a Latin E and a close E to a Latin I. Similarly an open O corresponds to a Latin O, and a close O to a Latin U. For the meaning of the terms open and close see the Dictionary at the beginning of the letters E and O.

Italian suffixes.

The Italian suffixes are, as might be expected, nearly all of Latin origin, as -accio and -azzo, < L. *-aceus*, -uccio < L. *-uculus*, -aggio < L. *-aticum*, and amount altogether to several hundreds. A very few are Germanic, as -ardo, explained on p. 47, -ingo, meaning "son of" or "descended from," *e.g.* in Casalingo. It would be beyond the scope of these stray notes to deal with the subject of suffixes in any detail, but a word or two by way of illustration is subjoined.

The suffixes of the Indo-European languages fall into two main classes, those with a definite meaning and those without one. The force of the latter is quite vague, expressing mere relationship with the stem or root of the word. Thus the Latin *testimonium* consists of the stem *testi-* with three indefinite suffixes, mon, io, m (of which the last, being substantival, ought perhaps to be ranked as definite), and means "thing having to do with witnessing," that is, "evidence." The piling up of suffix upon suffix does not seem to add anything more than would have resulted from the use of only one. Definitive suffixes, on the other hand, are often, possibly always, the addition of an element from another root, and add something to the meaning of the stem, as *-brum* in Latin, see -bro, p. 101. To this class also belong the suffixes which form the grammatical inflections of words; thus from the stem *ama-*, in Latin, are formed, by addition of the suffixes o, s, t, meaning "I," "thou," "he," the words *amao* (contracted to *amo*), *amas*, *amat*, I love, thou lovest, he loves.

Word-formation of this kind not only contributed to the development of languages in prehistoric times but is seen in the inflections of the Romance languages; thus Amerò, the future of Amare, is for an earlier Ameraggio, = L. *Amare habeo.*

A list of English suffixes, many of which are also Italian, is given in Chambers' *Twentieth Century Dictionary*, 1907 edition, p. 1154.

LIST OF SOME ITALIAN DICTIONARIES

1. Baretti's dictionary. Last revised in 1854.
2. Bulle and Rigutini, *Italienisches-Deutsches Wörterbuch*, 1902.
3. La Crusca, *Vocabolario*, still in course of publication.
4. Dabovich, *Technical and Marine Dictionary in Italian, German, English, and French*, 1884—1900.
5. Darchini, in French and Italian, no date given, but about 1905; the best small dictionary of the kind yet published.
6. Edgren, *Italian-English and English-Italian Dictionary*, 1904.
7. Fanfani, *Vocabolario*, 1865.
8. Ferrari e Caccia, in French and Italian, no date. A useful book.
9. Florio, *Queen Anna's World of Wordes*. Now rather rare, published in 1611, full of curious and interesting old English words.
10. Guglielmotti, *Vocabolario marino e militare*, 1889.
11. Lessona e A' Valle, *Dizionario di scienze, lettere e arti*, 1882.
12. Melzi, *English-Italian and Italian-English Dictionary*, 1906.
13. Millhouse and Bracciforti, *English-Italian and Italian-English Dictionary*, 1906.
14. Paasch, *Dizionario di Marina*, in English, French, Spanish, German, and Italian, with illustrative plates, 1908.
15. Petrocchi, *Novo dizionario universale*, 1906.
16. Premoli, *Vocabolario nomenclatore*, 1910, illustrated.
17. Rigutini e Fanfani, *Vocabolario italiano della lingua parlata*, 1871.
18. Salveraggio, *Vocabolario illustrato della lingua italiana*, 1908.
19. Sergent, *Nuovo vocabolario italiano domestico*, 1869.
20. Sergent, *Nuovo vocabolario italiano d' arti e mestieri*, 1869.
21. Stokes, *A Pocket Dictionary*, no date, about 1906.
22. Tommaseo e Bellini, *Dizionario della lingua italiana*, 1865.
23. Tommaseo e Rigutini, *Dizionario dei sinonimi*, no date, about 1875.

The above list is of course by no means exhaustive. But, though it seems a fairly long one, it contains no book which is very convenient for an English student of Italian language and literature; how far the present writer has succeeded in compiling one from the materials afforded by these works is for critics to say.

LIST OF PHILOLOGICAL BOOKS TREATING OF OR BEARING UPON ITALIAN ETYMOLOGY

1. Brachet, *Etymological Dictionary of the French Language*, translated by G. W. Kitchin, 1882.
2. Bréal et Bailly, *Dictionnaire étymologique Latin*, 1906.
3. Diez, *Etymologisches Wörterbuch der Romanischen Sprachen*, 1869.
4. Hatzfeld et Darmesteter, *Dictionnaire général de la langue Française*, 1890.
5. Kluge, *Deutsches etymologisches Wörterbuch*, 1905.
6. Körting, *Lateinisch-Romanisches Wörterbuch*, 1907.
7. Littré, *Dictionnaire de la langue Française*.
8. Pianigiani, *Vocabolario etimologico della lingua italiana*, 1907.
9. Prellwitz, *Etymologisches Wörterbuch der Griechischen Sprache*, 1905.
10. Schade, *Altdeutsches Wörterbuch*, 1882.
11. Skeat, *Etymological Dictionary of the English Language*, 1910.
12. Skeat, *Concise Etymological Dictionary*, 1901.
13. Walde, *Lateinisches etymologisches Wörterbuch*, 1906.
14. Zambaldi, *Vocabolario etimologico italiano*, 1889.

+; plus, together with.
=; is the equivalent of. As used in the explanatory text the sign implies that the word under discussion, though not obsolete, is obsolescent and unusual, and is the equivalent in meaning of the commoner word following it. In the etymology = means either "borrowed from," or "corresponding to." Thus Seppia is derived by regular development from the Latin *sepia*, but when this is stated to be = Gr. *σηπία* the meaning intended to be conveyed is that the Latin word is not native in Latin, but borrowed from Greek. But the sense of "=" in the etymology of Schiappare is simply that of "corresponding to." Common sense and the context will show which meaning is intended.
>, <; these algebraical signs are used to denote "source of" and "derived from" respectively.

*. Words so marked are obsolete or at least not in common use.
† indicates a word of local, generally Tuscan, use.
**. The double asterisk is used in the etymology to indicate theoretical or hypothetical forms, the existence of which is evidenced by known forms, see Introductory remarks, § 19.

Etym. Littré's account of the word is as follows. Walloon *harkibuse*, Burgundian *auquebutte*, Span. *arcabuz*, blt. *arcus busus*. It has been derived from the Italian Arco, bow, Bugio, hollow, the hollow bow, and Ariosto certainly gives the name of Ferro bugio, hollow iron, to the arquebus in the ninth canto of Orlando Furioso. But, continues Littré, if the old French name is *haquebute*, of which he quotes an example dating from the 15th century, the Italian word is probably an alteration of this French word, which it subsequently displaced from the French language. *Haquebute* is the German *Hakeabüchse*, Flemish *haak-bus*, meaning hooked arquebuse, from *Haken*, hook, and *Büchse*, gun, the hook being the forked rest on which the weapon was supported. *Haken* is a word common to the northern languages; *Büchse* is from the L. *pyxis*, Gr. πυξίς, a box, of which an equally great alteration gave rise to the French *boîte*.

Etym. A Celtic word, spread into the Romance languages from the English and French *harness*, *harnais*, which originated in the word for iron, as seen in Breton *harnez*, Welsh *haiarn*, Irish *iaran*. The E. iron, Germ. *Eisen*, O.H.G. *îsarn*, are from the same root. The modern Germ. *Harnisch* is from the Romance word. The original meaning is that of the old sense of E. harness and Fr. *harnais*, a complete suit of armour.

Etym. The word occurs in several of the Romance languages, but in the sense of claw, whilst the mlt. *harpa* meant harp, and may be the O.H.G. *harpha*, old Scandinavian *harpa*, A.S. *hearpe*. Diez thinks that in this sense also the word may be derived from the hooked shape of the musical instrument. The Romance *arpa*, claw, Fr. *harpe*, which means both harp and claw, as does the Provenç. *arpa*, is from the O.H.G. *harfan*, to seize; *cp.* Gr. ἁρπάζω, to seize, ἅρπη, hook, L. *harpagare*, and also *rapere*, to snatch; *v.* Skeat, *ed.* 1910, *sub* Harp, Harpoon.

Etym. Reduplicated from the syllable *ba*, one of the first uttered by babies, as papa from *pa*, *cp.* E. babe, baby. Or it may be from L. *pappus*, old man, Gr. πάππος, but infantile words are formed spontaneously everywhere. The syllable *ba* took the meaning of stammer, and from it were formed L. *babulus*, It. babbio, babbione, babbeo, babbuasso, all of which, meaning *orig.* stammering old man, have come to mean silly. From this natural sound *ba* come ba-l and ba-r, as in balbo, balbettare, barbogio, barbottare, but this ba-r is not to be confounded with the prefix bar-, *v.* Bar-.

(*mar.*) tub, bucket; — di combattimento, tub ready for putting out the beginning of a fire or tub of ammunition for the guns; — di scandaglio, tub containing the sounding line and lead.

Etym. Cogn. Fr. *baie*, Span. and Provenç. *bahia*, bay, Basque *baya*, bay (whence *bay-ona*, a good harbour, the source of the name of the city of Bayonne), Dutch *baye*, and in the sense of jest Span. and Portug. *vaya*, Fr. *baie*. Baia, bay, is the late L. *baia*, harbour; Isidore (6th century) has "*Hunc portum veteres a bajulandis mercibus vocabant baia*," this port received the name of bay from the transport of merchandise; an etymology which is not very convincing. The term may perhaps have originated, as Littré thinks, from the name of the city of Baiæ near Naples, this being afterwards generalised to mean any harbour. The origin of the word in the sense of jest is also unknown, but is probably from the imitative syllable *ba* and akin to Fr. *bayer* and Ital. badare, < late Latin *badare*, a word given by Isidore as meaning "to yawn"; it also appears as *battare*; "*Battat geonath*" is a gloss in the Corpus Glossary of Latin and Anglo-Saxon; *geonath* is early A.S. for "he yawns." On this shewing Baia would represent the gaping produced by the jester in his hearer, "parce que celui qui donne une *baie* fait *bayer* celui qui la reçoit" (Littré). In the phrases Voler la baia and so on, the word would rather seem to be connected with Abbaiare, which takes us back again to the syllable *ba* by a different route. Baia, in the marine sense of tub, is no doubt akin to Fr. *bayer*, to gape, so that the original sense would be "yawning cavity."

* i. title given in reverence or respect to saints and other personages. ii. man of valour. iii. husband. iv. Mandare *or* Andare al —, to obtain the highest throw of the dice. v. Mandare uno al —, to tell him to go to the devil.
Etym. (from Littré). "Walloon *baron*, husband; old Fr. *ber* or *bers*, accusative *baron*; Provenç. *bar*, accusative *baron*; Span. *varon*. The meaning of the word in the Romance languages is strong man, husband, brave soldier, noble, feudal lord. *Baro* occurs in Latin with the meanings (1) dunce, (2) camp follower, *goujat d'armée*, and is believed to be of Gaulish origin; Isidore assigns to it the meaning of mercenary, accustomed to hard work. Amongst the Celtic group we find old Welsh *bar*, hero. It is objected that it is only in Latin and German that nominative and accusative differ, but is our knowledge of old Celtic complete enough to enable us to say that it had no such inflection; and do we not find in low Latin *barus*: *barum vel feminam* in the law of the Germans? The word *fear*, man, also occurs in Celtic, and in fact we find *varones* in the texts which come from the neighbourhood of the Pyrenees, and *farones* in a very old author (see Du Cange). Diez is disposed to refer *baro* to O.H.G. *beran*, Goth. *bairan*, to carry, so that the primary meaning would be strong man and the other senses developments from this. Burguy also derives it from *bairan*, to carry, but by another route: A.S. *bearn*, Frisian *bern*, a child, a human being: A.S. *beorn*, a grown-up man. These Germanic etymologies without being completely certain are probable; but it is also probable that the Celtic *bar* and perhaps *fear* have concurred in confirming and defining the sense of the Germanic word and have left traces in *barus* and in *faro*. In old French we have *li ber* nomin. sing., from *báro* with an accent on the *a*; *le baron* accusative sing. from *barónem* with the accent on the *o*; *li baron* nomin. plur.; *les barons* accusative plur. The necessity of accounting for *ber* and *baron* by a moveable accent prevents us from paying any attention to *vir* which was formerly proposed as the etymology."
The Italian Baro, cheat, with its augmentative Barone, must be the Latin *baro*, though the meaning of *baro* was not "cheat" but "dunce." The L. *baro* is not the same word as the mlt. *baro*, but its etymology is unknown.

*i. open carriage for festal occasions. ii. gallows.
Etym., in sense of pillory, *unkn.* The suggestions are:—(1) Fr. *pilori*, through a *dim.* (with metathesis) ****pirolina*, (2) blt. *berlenghum*, board, *v.* Berlan, referring to the stand on which the prisoner in the pillory was mounted, (3) It. barella, barrow, through contraction of a form ****barellina*, referring to the vehicle in which the prisoner was taken to the pillory. Of these derivations perhaps the third is the most likely.
The origin of Fr. *pilori* (>E. pillory) is also unknown; Körting is inclined to regard it as modified from Provenç. *espitlori*, pillory, under the influence of *pilier*, pillar, and to endorse a derivation suggested by Wedgwood for *espitlori*, *viz.* < blt. ****specularium*, peepbole, referring to the hole where the prisoner's head was confined by the neck.

*Berrovaglia *f.*; quantity of police.
*Berroviere; i. armed policeman under the orders of the Podestà in the medieval republics. ii. = Birro, policeman. iii. ardent soldier.

Etym. The original meaning of the word is said to be "soldier belonging to the advanced guard," <Provenç. *berrovier* or old Fr. *berrouier*, meaning inhabitant of the Berry; men of noted bravery from the Berry may have been employed on dangerous expeditions. There is, however, another quite different derivation given, *v.* Birro and Birroviere.

Bersagliare; to batter with artillery; *fig.* to torment.

Bersaglière *m.*; 1. sharpshooter. 2. in *pl.*, the name of a corps of the Italian army.

Berságlio *m.*; 1. target; Metter a —, to endanger. 2. practising ground, or meeting for practising shooting. *battle.

Etym. Old Fr. *bersail*, target, <old Fr. *berser*, to shoot (with arrows), perhaps <L. *versare*, *freq.* of *vertere*, referring to the movements of aiming, *cp.* It. berzare.

†Bersciare; = Berciare, to screech.
Bersò *m.*; = Fr. *berceau*, arbour.

Etym. *Berceau* originally meant cradle, *cp.* *bercèr*, to rock, a word referred by Hatzfeld and Darmstetter to *bers*, cradle, of unknown origin. Körting suggests that *bercer* is < L. *versare*.

Bèrta *f.* (**A**); 1. pile-driver. 2. rammer. 3. jest; Dar la —, to ridicule. 4. (*ornith.*) (*a*) — maggiore, cinereous shearwater, *Puffinus Kuhli*, (*b*) — minore, Manx shearwater, *Puffinus anglorum*, (*c*) = Ghiandaia, jay.

Etym. unkn. Diez refers the word to the Bertha of Germanic legend who frightened children by trampling, and quotes in support of this view Fr. *demoiselle* and Russian *baba*, woman, both used in the sense of rammer. Alternative derivations are (1) O.H.G. *bret*, a board, (2) M.H.G. *barten*, to smite with a *bartâ*, battle-axe, (3) blt. **verritus*, irregular *part.* of L. *verrere*, to sweep along, which, however, fails to account for the meaning.

For the sense of jest Körting suggests that the phrase Dar la' berta may have arisen from workmen dropping rammers on each other's toes by way of a practical joke, which seems very far-fetched. Diez connects the word in this sense with old Fr. *bertondre*, to shear clumsily, <*tondre*, to shear, <L. *tondere* with *pegg.* prefix, *v.* Bar-; *cp.* Fr. *bretauder*, to crop the ears.

Etym. The source of the word is the L. *bullare* of *imit.* origin, from the bubbling of boiling water. From this came *bulla*, water-bubble, which in Latin was used for various rounded things and in mlt. became the little leaden ball attached to the seal of a document, and hence was taken for the document itself which is the origin of the Papal "bull," *v.* Bolla. From *bulla* in the sense of document the E. word bill was developed, with the corresponding meaning which it still bears, as well as a similar Latinised form *billa*, so that in mlt. *bulla* and *billa* exist side by side. From a *dim.* of *billa* came the Fr. *billet*, which, lastly, was Italianised into biglietto.

Bòdola (Botola) *f.*; 1. opening in a floor or pavement leading to a cellar. 2. cover for the same, cellar-flap, trap-door.

Etym. unkn. Probably < blt. *bodula*, a *var.* of *bondula*, boundary, which agrees perfectly in form though not in meaning. The explanation appears to be that the meaning of boundary is a separate development, which does not concern the Italian word, the proper meaning being that of plug-hole or plug, preserved in Fr. *bonde*, Germ. *Spund* (where the *s* is a prefix = L. *ex*), < L. *puncta*, orifice, through a *dim.* ** *punctula*, > bondula, *v.* Skeat, *sub* Bung.

Other suggestions are (1) that the word is akin to Budello, *q.v.*; (2) < It. voto, > ** votola > botola; (3) < blt. *bustula*, chest, *dim.* of L. *bustum*.

Bòia *m.*, with plural also Boia; executioner. † *f.*, with plural Boie; = Gavitello, buoy.

Etym. L. *boiae*, a collar of wood or iron, such as those by which slaves were chained by the neck to a wall for punishment; it then came to mean thong for strangling and so passed in Italian into the sense of hangman, whilst in late Latin it meant chain and so produced Fr. *bouée*, E. buoy, and the Italian term Boia, used at Leghorn, as being a thing moored by a chain. The Latin *boiae*, as making a mark upon the slave's neck, may have been the origin of the It. bogia, speck. The resemblance of *boiae* to Gr. βοεία is probably accidental; Walde quotes with approval a surmise that the implement was adopted by the Romans from the Boii and named accordingly, just as the Fr. *cravatte* was formed from the name of the Croats.

Etym. Littré speaking of the Fr. *brusque* writes: "the word is Italian, origin uncertain. Diez finds in it the O.H.G. *bruttisc* contracted to *brutt'sc*, grim. Others refer it to a Celtic source, Gael. *brisg*, Welsh *brysg*, brisk. Or it may be from Latin and be akin to bruscolo, brusca and brusco (the plant); the radical meaning would be that of pricking." Other conjectures quoted by Zambaldi are mlt. *labruscus*, uncouth, It. rustico, **rust'co, and L. *bruscum*, excrescence on a maple tree. In the sense of butcher's broom, the word may reasonably be referred to L. *ruscum*. Butler suggests that *ruscum* was *orig.* an *adj.* meaning rough or prickly, in which case brusco might have been formed from ***perruscus.*

Cantimplòra or *pop.* **Cantinflòra** *f.*; water-cooler.

Etym. The word occurs in the same form in Spanish and with the same meaning, *viz.* tin or glass vessel for cooling water by plunging it into a larger vessel containing ice or snow. The French *chantepleure*, though a word of very similar form, means a spout with a rose, but the dripping water-cooler may well have been named after the dripping *chantepleure*. An ingenious guess is given by Caix and accepted by Körting that the origin of both the Italian and Spanish forms is the L. *canna* ***implétoria*, but it seems more natural to trace *chantepleure* to *chanter*, *pleurer*, and the Italian and Spanish words to this.

The original meaning of Capere was, to take, but there remains no example of this in the material sense. The usage of the word by early writers is as follows:

i. as an operation of or upon the mind, Questo mi cape, *or* non mi cape nell' animo, nel giudizio, nel pensiero, ecc., meaning, I take this, I judge this, etc., to be so and so, or I do not understand it, etc.; another meaning of the same phrase is, this is, or is not, readily intelligible to me. Secondo che nel l' animo gli capea (Bocc. Nov. 56. 3), as it appeared to him. E però nel mio giudicio cape tutte quelle esser degne....(Bocc. Nov. 89. 4), accordingly, in my judgment they all merit.... E quant' è 'l dolce male

Nè 'n pensier cape non che 'n verso, o in rima (Petr. Son. 149), it cannot be conceived far less expressed in verse or rhyme how great is the sweet pain. Cose appena cappion nel mio pensiero, as soon as these ideas suggest themselves (Firenzuola, Asino d' oro, 257).

ii. to contain. Maggior salute maggior corpo cape (D. Par. 28. 68), a greater amount of wholesome influence is contained in a body of greater volume.

iii. to find room. Tante femmine concorsero nel castello che appena vi capeano (Bocc. Nov. 60. 14), so many women assembled in the castle that there was scarcely room for them. Tutto lo dificio insieme era di tanta larghezza che ci sarebbero caputi forse ben cento uomini (Vit. SS. Pad. 1. 128), the whole building was so large that a good hundred men might have got into it.

iv. of a mental image, to occupy the mind of; Perchè...mi cappia (D. Purg. 21. 81), that I may be seized of the reason why....

v. to live, to abide. Conveniva che Romulo non capesse in Alba...a voler che diventasse Re di Roma (Mach. Princ. 34), it was unsuitable that Romulus should live at Alba...since he wished to be made king of Rome. Similarly *fig.* Volendo il popolo vivere secondo le leggi e i potenti comandare a quelle non è possibile capino insieme (Mach. Stor. 2. 302), if the people wish to live under the laws and their rulers to be above the laws it is impossible that people and rulers should get on together, *lit.* find room for themselves together, *v. supra* (iii). Capino is here irregularly used for Capano.

vi. Non capere in sè stesso, nella pelle, ne' panni, to be unable to contain oneself, *lit.* not to find room for oneself, as *supra* (iii). This phrase, with the word Capere replaced by Capire, is still used. Andava...tanto lieto che egli non capea nel cuojo (Bocc. Nov. 85. 12), he was so delighted as to be almost beside himself, *lit.* he could not find room in the leather, *i.e.* in his skin.

vii. Non capervi, to find no place, to be impossible. Volle provar di far tra i due Re pace... Ma loro andata fu tutta fallace Perchè pace tra lor non vi capeva (Ant. Pucc. Centil. 31. 90), peace between them being impossible.

☞ An Italian pack consists of forty cards in four suits termed Danari, Coppe, Spade and Bastoni, or coins, goblets, swords and clubs, the cards being figured with these instead of the variously shaped pips of French or English cards. The Italian names of the suits in a French pack are Cori hearts, Quadri (sometimes Mattoni) diamonds, Picche spades, and Fiori clubs. If a French pack be taken to be used as an Italian one, the eights, nines and tens being thrown out, so as to reduce the pack to forty, the names of the suits will be Danari for diamonds, Coppe for hearts, Spade for spades, and Bastoni for clubs. The Italian names of the suits in a French pack are all feminine and indeclinable but plural in form, as in the refrain, La picche, la quadri, la fiori ce l' ho, Dammi il tuo cuore (*scherz.* for la cori) primiera farò.

Etym. § 1. From a Germanic root *klap*, the original sense of which is to make a noise by striking, *cp.* E. clap. This passed into the Romance languages where it was widely developed, *v.* Körting, Lat. Rom. Wörterb. (1907), No. 5282. Chiappare is attributable to a form ***klappare*. The idea of catching comes from the application of the root-word to the sound of a falling trap, *cp.* O.H.G. *klappa*, Germ. *klappe*, flap, E. clap into prison. § 2. Cognate Italian offshoots are Chiappa, Chiappo, Chiappone; also Chiappino (from the flapping of the slipper against the ground). § 3. Further, the root being applied to the cracking sound of splitting wood, we have from ***exklappare* the Ital. Schiappa, splinter, and similarly, from the sound made in stone breaking, Chiappolo, heap of chips, Chiappola, *orig.* chip, hence worthless article, Chiappolare, to throw into the heap of chips, *cp. Clap*, in the Friuli dialect, a stone. § 4. From ***exklapitare* would come Schiattare (*cp.* Provenç. *esclatar*, Fr. *éclater*) or, with intrusive *n*, Schiantare; here too probably belongs Schiatta, race, family, O.H.G. *slahta*, Provenç. *esclata*, originally a figurative use of the meaning "chip." § 5. Again from ***claptus* (formed from the root under the attraction of L. *raptus*, *captus*) in the sense of banged together, flattened, may perhaps be traced Chiatto, squat, Chiatta, with a variant Sciatta, barge (*cp.* Sicilian *chiattu*, Genoese *cattu*), and Zatta, Zattera, raft. § 6. Lastly, from a variant *klaf* for *klap* comes Schiaffare, to give a box on the ears.

Exact *etym. dub.*, being either Gr. χημεία or χυμεία (justifying the two ways of spelling in French and English). Chemistry originated at the Alexandrian medical school and may have taken its name from χημία, the Greek form, as in Plutarch, of the native name of Egypt, *Khem*, afterwards confused with the like-sounding Gr. χυμεία, from χυ, the stem of χέω, to pour, cp. χυμός, juice, which seemed to express its meaning. Mahn, however, considers that χυμεία was probably the original, being first applied to pharmaceutical chemistry, which was chiefly concerned with the juices of plants, that the pursuits of the Alexandrian chemists were a subsequent development of chemical study and that the notoriety of these caused the name of the art to be popularly associated with the ancient name of Egypt and spelt χημεία, χημία, as in Diocletian's decree.

From the Alexandrians the art and the name were adopted by the Arabs, whence they came to Europe by way of Spain. (See Murray, New E. Dict., *sub* Chemistry, from which the above account is taken.)

Etym. These and several cognate Italian words, Degno, Destro, Dottore, etc., are from Latin forms, traceable to a root *dek*, of which Walde gives the following account under the word *Decet*.

"*Decet* (*deceo*), it is becoming, *decus -oris*, ornament, = Umbrian *ticit* '*decet*,' with an irregular *i* (perhaps also Oscan *deketasiui*, *degetasis*, if Brugmann is right in rendering it '*ordinarius*'; it is more likely to have meant *decentarius*); corresponding Sanskrit words are *deçasyati*, 'he shows honour,' 'is gracious' (a denominative form < ***daças* = L. *decus*), *daksati*, 'is clever,' 'makes one feel comfortable,' 'is agreeable,' *daksas*, 'clever,' *cp.* Irish *deck*, 'the best, most advantageous.'

Here according to Persson is to be found the stem of L. *dexter*, formed with the prime grade of the *es-* stem from *decus*, the right-hand side being regarded as the fitting, good, or serviceable side.

Linked with the Indogermanic ***dek*, to seem good, or something of that sort, are: L. *doceo*, to teach, *i.e.* to exhibit something as right or enlightening; Gr. δοκέω, to seem, δόξα, opinion, δόκιμος, reputable, δόγμα, determination; also L. *disco*, to learn; Gr. διδάσκω, to teach, which can hardly be separated from disco, διδαχή, teaching.

It is true that the Gr. α constitutes a difficulty; it may perhaps indicate a parallel form *dēk* with the vowel long, which was perhaps also the root of *disco*. Or there may be another root *dengh* with a similar meaning, *viz.* to appear, which is seen in Lithuanian *dingo*, it seems; *dingotis*, to appear to oneself; *padingti*, to please; old Prussian *podingai*, is pleasing.

The root sense however of these words, *doceo* to διδαχή above, may be that of mental perception, so that we should regard them as being in close connection with *dek*, to receive, to observe, in the Gr. δέκομαι, to accept, as well as the following, viz. δοκάνη, θήκη, receiving; old Bulgarian *desiti*, to find; Servian *desiti*, to hit, *u-des*, misfortune; A.S. *tigthian*, to observe, *tigth*, observation; and besides these, from the Indogerm. *dēk*, whether a lengthened grade or a parallel form as above suggested, the Sanskrit *dāçti*, *dāsti*, *dāçnoti*, he brings sacrifice, he shows respect, he furnishes, bestows, and the Gr. δήκνυμι, spelt thus instead of δείκνυμι, to greet.

Prellwitz derives δέκομαι from the action of holding out both hands, whether for greeting, giving, or taking. If he is right *decet* may perhaps have a root of more limited signification, *viz.* to be acceptable or something of that sort."

Do *m.*; the C of German music. The Italian names of the notes are associated by tradition with Guido, or Guittone, of Arezzo in the eleventh century. The story is that when eight years old he was placed in the Benedictine monastery of Pomposa where he learned to sing in *Canto fermo*, or Gregorian chant, the only kind of melody then used in churches. It would appear that the training was very hard on account of the difficulty in familiarising pupils with the intonation of sounds, which was due to confusion in the notes, and to meet this inconvenience he sought for a means of instituting a rule or scale. He noticed that in the chant used in singing the Latin hymn to St John composed by Paul the Deacon the first syllables of the six half-lines formed by their intonation an ascending diatonic progression. These syllables were ut, re, mi, fa, sol, la, and came from the following stanza:

"*Ut* queant laxis—*Re*sonare fibris
*Mi*ra gestarum—*Fa*mule tuorum
*Sol*ve polluti—*La*bii reatum
Sancte Johannes."

The present Do is modified from Du, a reversion of Ut, Do being a form better adapted for the natural production of the voice. Guido having invented the six notes, La Maire a century later added the seventh note Si, which stands for the Sa of Sancte.

Etym. Cogn. Fr. *douve*, stave, Norman *douve*, ditch of stagnant water, Walloon *dewe*, Provenç. *dogna*, cavity, Milanese *dova*, mlt. *doga*, channel for water (in Gregory of Tours), Germ. *Daube*, Dutch *duig*, Swiss *dauge*, which are Germanic words meaning "stave"; besides these there is a L. *doga* meaning "vase" which Du Cange connects with Gr. δοχή, reservoir. Diez accordingly sets out the series of meanings reservoir, ditch, edge of a ditch, that which holds the water in a cask, *i.e.* the stave, as well as the Italian sense of stripe (Littré). But it seems more likely that, as Körting suggests, there are two origins for the words, one the Gr. δοχή, giving the sense of "stave," the other the Low German *dobba* that of "ditch."

☞ "The verbs Dovere, Potere and Volere take the auxiliary in compound tenses belonging to the verb they govern, thus:—Ho dovuto concedergli tutto quello che mi ha chiesto: Avrebbe dovuto dare il buon esempio: Non han voluto mantenere la promessa, because the verbs Concedere, Dare, Mantenere are transitive and conjugated accordingly with Avere; similarly, Non ho potuto dormire, Ho dovuto, *or* voluto sedere in terra, because Dormire and Sedere are amongst those intransitive verbs which take Avere as their auxiliary. But:—Son dovuti venir soli, La cosa non era potuta riuscire, È voluto partir subito, because Venire, Riuscire, Partire, are intransitives conjugated with Essere.

"In the case of reflective and reciprocal verbs, if the reflective pronoun is affixed to the verb, the auxiliary used with Dovere, Potere, Volere, is Avere, as Tu non avresti dovuto affligerti così. But if it is divided from its own verb and precedes Dovere, Potere or Volere, these verbs are then conjugated with Essere, as Tu non ti saresti dovuto affliggere così" (Rigutini and Fanfani, Lingua italiana parlata).
